

Allsports Orthotic Guarantee

At Allsports Podiatry we take pride in ensuring your orthotics are made to the highest quality using the latest materials, the most accurate 3D laser scanners & CNC milling machinery.

This is why we can guarantee our orthotic devices for 12 months. If there are any manufacturing faults they will be repaired at no cost during this time.

Modifications to the prescription of the orthotic will be included in the cost of the device for the first 6 weeks.

Price Guide

FAQ

Allsports Podiatry provides quality care for both the amateur and professional athlete.

Our specialties include:

- lower limb injury management
 - gait analysis
 - sports orthotics
- footwear recommendations
 - paediatric assessments.

We also cover all of your general podiatry needs including ingrown toenails, corns/callus.

Orthotics vary in price depending on your prescription & design. Your podiatrist will help you determine the most suitable option for both your foot type and choice of shoe.

* These prices are for the orthotic product only. Consultation fees will also apply. Please ask your podiatrist for further details.

What do Podiatrists do?

Podiatrists are the primary health care provider for foot and related lower limb conditions.

Do Orthotics change my foot shape?

No. Orthotics are used purely as an aide to “hold” your feet into a more efficient position to help relieve and prevent pain or improve function.

Will I need Orthotics forever?

No. Only certain foot conditions and foot postures require long term orthotic use. Many require orthoses in the management of their particular injury and rehabilitation.

How are Sports Orthotics different to Rigid Orthotics?

Sports Orthotics are made with different movements of the foot in mind. For example foot stresses in straight-line walking are quite different from multidirectional sports such as football or netball.

How long will it take to get used to having orthotics in my shoe?

This will vary between a 3-10 days. It is advised you slowly break them in over this time (increase by 1 hour per day). At the 2 week review your podiatrist will make slight adjustments if necessary.

Does Private Health Insurance cover orthotics?

Most private health funds pay a rebate on orthotics every calendar year ranging from \$120-\$500. Please check with your health fund if you are unsure of your cover.
